SUMMARY

Software engineering graduate with a focus on writing clear, maintainable code, looking to contribute to real-world projects while continuing to grow in a collaborative engineering environment.

EDUCATION

Rochester Institute of Technology: Bachelor of Science, Software Engineering, Web Development Minor May 2024
GPA: 3.580 Dean's List: Spring 2021 - Fall 2024

CERTIFICATIONS

AWS Certified Cloud Practitioner May 2026

SKILLS

Programming Languages: C#, Python, Java, TypeScript, JavaScript, SQL, RESTful APIs, React, Angular, HTML, Bootstrap, CSS, Spring, XML, PowerShell, JSON, Git

Development Software: GitHub, Visual Studio Code, IntelliJ IDEA, Jira, Trello, Docker, Postman, Figma

Operating Systems: Windows 11, Unix, Ubuntu, Linux

Methodologies: Agile, Scrum, Model View Controller (MVC)

Other Skills: Test Driven Development, Software Development Lifecycle (SDLC), Relational Database Design

EMPLOYMENT

Innovation Fellows Program June 2023 – August 2023 *Web Developer* Rochester, NY

- Collaborated on a team of two other developers to revamp Resonant Technology Group's website to appeal to their audience
- Examined Resonant Technology Group's website to find aspects of it that can be improved by the team
- Led the development team in using HTML, CSS, JavaScript to rebuild the website from the ground up
- Improved the quality and user experience of the website which would be later used by the company

Excellus Blue Cross Blue Shield January 2023 – May 2023 *Software Testing Intern* Rochester, NY

- Collaborated on a small team to develop automated tests for the company portal to test if the insurance claim statuses matched the expected claim statuses
- Utilized Java alongside Selenium and CSS to retrieve elements from the webpage and use them in tests
- Created automated tests for the webpage that would be used by the company
- Trained in Selenium, workflows, JUnit, and Python

M&T Bank June 2022 – August 2022 *Software Developer Intern* Buffalo, NY

- Collaborated on a small team to develop software for the environment dashboard meant to test the main application the team works on.
- Utilized the framework Angular and created methods to make SOAP and REST calls to get data from the backend server.
- Improved UI of the dashboard to facilitate usability using Bootstrap and TypeScript
- Saved the company approximately \$200,000 to \$400,000
- Trained in Cloud Computing, Communication, Python Bootcamp, Fraud Prevention, Cybersecurity

PROJECTS

Career Readiness Dashboard (RIT Senior Project) August 2023 - May 2024

- Met regularly with sponsors at SUNY Oswego to gather requirements for the product
- Led the team in developing an effective code review process as the code review lead
- Developed a webpage using Angular, TypeScript, Java, Spring Boot, and MySQL that allows users to view their profile
- Presented the solution to stakeholders with a tech demo included

Basic-Crypto-Challenge-2022 (M&T Tech Coop) July 2022 – August 2022

- Developed methods to encrypt and decrypt messages using caesar and vigenere cyphers.
- Practiced bruteforcing messages encrypted through these cyphers to test the efficiency of these encryption methods.

AWARDS

Pathfinding Algorithm M&T Tech June 2022

Achieved first place in a competition aimed at developing a pathfinding algorithm that calculates the shortest path between all of the listed destinations in the Buffalo area.
